

RECOMMENDATION LETTER

Ms. Diane Warren has been Rejuvi Authorized Tattoo Removal Trainer (# RLTR 160111) for both correction of micropigmentation and body tattoo removal.

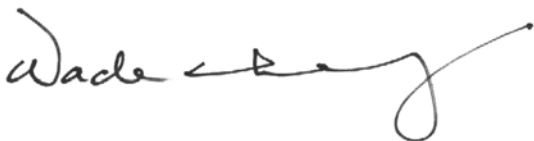

Diana Warren is one of a few non-laser tattoo Removal experts (chemical extraction mechanism) I have endorsed without restraint.

When Diana Warren went through Rejuvi training in South San Francisco, I was impressed by her attention to details and her eagerness to learn deep knowledge about the art and science of non-laser Tattoo removal process.

If you want to lean how to make tattoo removal in right way then I highly recommend taking training class from Diana Warren if the opportunity even presents itself.

Please do not hesitate to contact me via E-mail: rejuvi@att.net or fax (650)588-7796 should you have any question about this matter.

Faithfully yours,

Dr. Wade Cheng, Ph.D. ScD.
CEO of Rejuvi Laboratory Inc.

The inventor of Non-Laser Tattoo Removal Technique
(The first introduction in les novellous esthetiques magazine in March 1997
and the formal publication in Cosmetic Dermatology in April 2001)
